 Top-up a virtual wallet which will makes activating a charge much quicker.

Ę

Pair RFID Cards/Fobs

- · Pair your own or host-supplied RFID cards/fobs to your account. (Most Mifare 1K vehicle/charging network/security access cards/fobs can also be used).
- Use your registered RFID cards/fobs to activate charging sessions on host-enabled free-to-charge tariffs.

For support call: 01205 725765 email: support@vendelectric.com vendelectric.com

Register An RFID Card/Fob

Only registered users who have been added to a driver group by the chargepoint Host/Fleet Manager will be able to register an RFID to their account.

Once a driver has been added to a driver group they will see the **RFID Fobs & Cards** displayed on their **My Account** page. (As shown)

1

Add new RFID card/fob

You can register either, a personal RFID card/fob, or one issued by a chargepoint Host. (eg. vehicle/charging network/security access).

- Go to My Account screen in the app.
- Select RFID Fobs & Cards.
- Select Add New.
- Follow the step-by-step on-screen instructions to add the RFID card/fob.

Once a card/fob is registered on the system at one chargepoint, the same cards/fobs will function with all chargepoints within that chargepoint group, unless restricted by the Host.

Using An RFID Card/Fob

Start a session using your RFID card/fob

- · Connect the vehicle to the chargepoint.
- Touch the RFID sensor with the card/fob.
- If authorised for use, the chargepoint's LED status indicator will flash green, shortly followed by solid green once the charge session has started.

If the session does not initiate please present the card again. If the problem persists contact the Chargepoint host to ensure your account has been added to the driver group in the Back-Office Management Suite.

2 Endir

Ending a charging session

Your charging session will end when one of the following events occurs:

- The RFID card/fob is held against the RFID sensor again.
- · The vehicle is fully charged.
- The cable is unplugged from the vehicle.
- The time allocated for charging is reached (set by the Host).
- The charge session is stopped via the app.
- · A charging fault occurs.
